BAMBOO
The benefits are endless! In addition to being strong and renewable, bamboo is also naturally resistant to pests and requires little water to grow. This along with its ability to absorb relatively large amounts of CO2 from the atmosphere makes bamboo a very environmentally friendly crop.

BAMBOO BENEFITS

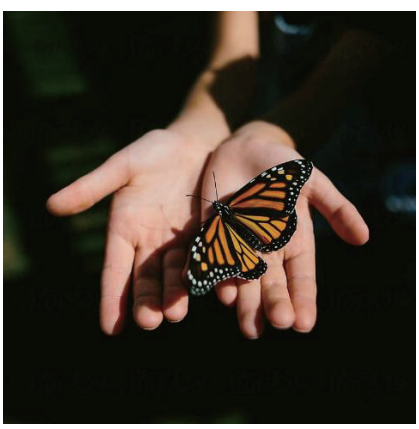

PRODUCT
BAMBOO BENEFITS

SIKLE SCD™
Art bamboo life

Bamboo growth

Bamboo is a grass species known for its rapid growth and versatility. Bamboo species can grow up to 90cm per day and reach maturity in just a few years. Bamboo is considered one of the most sustainable and environmentally friendly plants in the world. Bamboo requires very little water, pesticides or fertilizer to grow, and it can be harvested without destroying the plant.

No Pesticides

Bamboo is generally considered a very low-maintenance plant that is resistant to most pests and diseases. Therefore, it does not require the use of pesticides to grow successfully.

One of the reasons why bamboo is considered a low-maintenance crop is that it has a very thick and dense canopy that helps keep out weeds and other potential resource competitors. In addition, bamboo has a very extensive root system that provides access to water and nutrients deep in the soil, making it less dependent on fertilizer.

Doesn't need much water

Bamboo is known for its drought tolerance and low water requirements. Many species of bamboo can grow well in areas with limited water resources and can thrive in both dry and wet climates.

Bamboo has a very deep and extensive root system that allows it to draw water and nutrients from deep within the soil, which helps it survive in times of drought. In addition, bamboo has a thick and dense canopy that helps to shade the soil and reduce evaporation, which in turn helps to conserve water.

BAMBOO BENEFITS

PRODUCT
BAMBOO BENEFITS

SIKLE SCD™
Art bamboo life

Bamboo absorbs CO2

This is because bamboo is a fast-growing plant that can reach maturity in just a few years. To make that gorie possible, bamboo can extract large amounts of CO2 from the air in a short period of time and use it to grow its leaves, stems and roots.

A study has shown that one hectare of bamboo can store about 60 tons of CO2 over a 20-year period, which is roughly equivalent to the amount of CO2 emitted by an average car that drives about 12,000 kilometers per year.

Easy composting

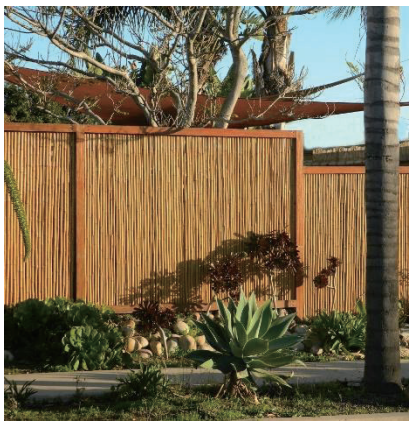

When bamboo is harvested, it leaves behind a large amount of organic material in the form of leaves, stem and root remnants that can be used in composting.

Bamboo contains a lot of cellulose and lignin, two important ingredients for good composting, and it breaks down quickly, creating a good balance of carbon and nitrogen. Also, because bamboo is a grass, it contains a lot of silica, which can improve the structure of compost.

FRAME BAMBOO FENCE

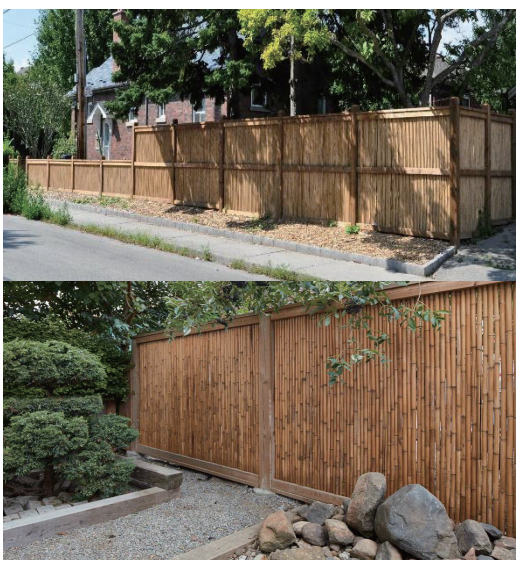

SIKLE SCD™
Art bamboo life

Frame bamboo fence

SIZE:
- *Diameters: Ranging from 3/8"-5"*
- *Lengths: Ranging 4'-16'*

DESCRIPTION

Tonkin bamboo is easy to work with and is available in a number of colors choices. The most common is a beautiful "even" honey appearance throughout the poles, and compared to other bamboo species, has the least amount of variations or scaring. The Natural Black Tonkin bamboo is a dark richer color option, that is more unique than the traditional "golden" color that is most often recognized. Compared to other bamboo, Tonkin is light weight making it ideal for overhead applications. Although available in larger diameters, this species of bamboo is thin walled. Performance of Tonkin is best when used outside of heavy guest contact areas and is widely used for exterior and interior applications.

APPEARANCE:

- *Natural: Honey/Tan*
- *Brown*
- *Black*
- *Speckled*

Colors will vary slightly based on harvesting and finish. Naturally straight versus milled.

APPLICATIONS:

Interior or Exterior Casing, wall cladding, ceiling coffer's, privacy fencing, batons/purlins, trim, retail fixtures, false ceiling beams

Willow Fencing

SIZE:
Height:6 feet
Length:16 feet
with a ½ inch gap between each branch

DESCRIPTION

Willow fencing, durable, lightweight and, boasting a rich brown appearance is an ideal product selection whether rustic charm or contemporary appeal is the design intent. Constructed of individual freshwater willow's and fastened by a thin, discrete wire, willow fencing is ideal for wall and ceiling coverings, column cladding, privacy screening and is an excellent substitution for unsightly construction fencing. Easy to install···Willow Fencing can be easily secured to vertical and horizontal posts by utilizing the wire and fastening with an electrical staple. Overhead applications can be secured with pin nails directly through the willow and wire connection.

APPEARANCE:

Espresso
Colors will vary slightly based on environmental factors

APPLICATIONS:

Interior or Exterior
Construction and privacy fencing, wall and ceiling coverings, cabinet inlay, wrapping columns, framed room divider/infill.

REED FENCE

SIKLE SCD™
Art bamboo life

Reed Fencing

- *6 Foot Height*
- *16 Foot Length (Total with both Fences is 32 Feet Length)*

DESCRIPTION

Constructed of freshwater reed grown along riverbanks and wetlands that are fastened together by thin horizontal wires. Reed Fencing panels are ideal for adding a touch of authenticity to a tropical environment. The product is often used commercially as construction fencing in lieu of unsightly typical construction barriers and, for privacy screening. Reed fencing can also be used as a wainscoting wall treatment or ceiling treatments. To create a more custom look, consider staining or white washing our Woven Bamboo Plywood. Easy to install···Reed Fencing can be easily secured to vertical and horizontal posts by utilizing the wire and fastening with an electrical staple.

APPEARANCE:

Honey & light beige with speckles of mocha
Colors will vary slightly based on environmental factors

DURABILITY:

Best suited for interior applications or exterior applications covered and clear of direct exposure to the elements. Speak with your SIKLE SCD Rep to discuss the many ways that you can extend the life of the product and alter the appearance.

SIZE:

Sheets: 6' x 16'

APPLICATIONS:

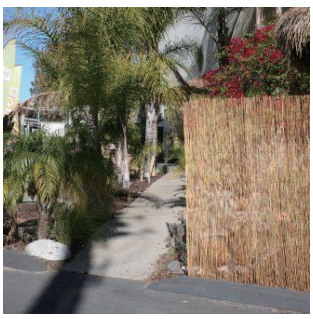

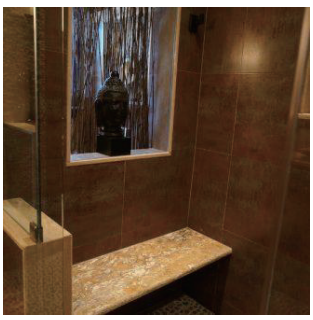

Interior or Exterior
Construction and privacy fencing, wall and ceiling coverings, cabinet inlay, wrapping columns, framed room divider/infill.

SIKLE Fence

SIZE:
- Diameters: Ranging from 2"-3.5"
- Lengths: Ranging 4'-8'
- Height : Up to 8'

SIKLE Fence Application

DESCRIPTION

Our hearty SIKLE Fence poles are a choice selection when looking for a timber that is unlike the others. The variations of brown running vertically throughout the pole and "swirls" or knots, provide a uniqueness that is sure to make your project a standout. SIKLE Fence also takes stain very easily and can be brought to a deep, rich finish by applying teak oil or paste wax.

APPEARANCE:

Beige, medium and dark brown (with mahogany hues)
Colors will vary slightly based on harvesting.
Naturally straight versus milled. Knuckles branch off slightly

APPLICATIONS:

Interior or Exterior
Fencing, shade structure, handrails, retail fixtures

Note: To ensure your fence has the longest useful lifespan and avoid accelerated rot, be sure to keep the bottom of the fence slightly raised above the ground level to avoid moisture being 'wicked' up into the fence. This is especially true for our SIKLE Fence.
